

Lutfir Rahman Saipudin

Software Engineer (Web & Mobile Development)

+60 11 1058 5345 | lutfirrahmansaipudin@gmail.com | 42700 Banting, Selangor Darul Ehsan, Malaysia

PROFILE SUMMARY

Results-driven Software Engineer with hands-on, production experience across government mobile and web systems, spanning an industrial training placement and a subsequent full-time role at the same company. Proven ability to deliver in Flutter and Laravel/Node.js environments, integrate REST APIs, support UAT/FAT cycles, and work directly with PostgreSQL and MySQL for reporting. Seeking a Software Engineer role to continue building scalable, high-impact applications.

TECHNICAL SKILLS

Programming Languages: JavaScript, PHP, Dart, Java, C, C#, C++, SQL
Frameworks & Libraries: Flutter, Laravel, Node.js, Express
Web Technologies: HTML5, CSS3, RESTful APIs, JSON, Bootstrap
Databases: MySQL, PostgreSQL, basic NoSQL concepts
Tools & Platforms: Git, GitLab, GitHub, Figma, OpenAPI/Swagger, HeidiSQL, Android Studio, VS Code
Practices: MVC Architecture, Agile/Scrum, SDLC, UAT, FAT, Clean Architecture, Debugging & Troubleshooting

PROFESSIONAL EXPERIENCE

Software Engineer – Mobile Application Development Team **April 2026 – Present**
ISIANPADU SYSTEMS SDN BHD

- Continued with ISIANPADU SYSTEMS SDN BHD as full-time staff on the Mobile Application Development Team after completing the industrial training placement, working on government-sector systems.
- Participated in User Acceptance Testing (UAT) and worked directly on the e-Appointment and e-Invitation modules, delivering 30+ commit changes.
- Attend Final Acceptance Testing (FAT) sessions and assist the team in resolving user-reported feedback and issues on live systems.
- Generate data reports using SQL queries to support project stakeholders and management reporting.
- Wrote SQL queries against a government CMS database (cms_ctbr) in HeidiSQL, including multi-table joins and data-request queries used for FY2026 contribution/withdrawal reporting.
- Expanded database expertise to PostgreSQL, building on existing query experience with MySQL/HeidiSQL.

Internship Trainee – Technical & Project Department **August 2025 – January 2026**
ISIANPADU SYSTEMS SDN BHD

- Developed and deployed Flutter mobile modules for MyWIRA, a government LTAT (Lembaga Tabung Angkatan Tentera) application serving military fund members, using Riverpod, go_router, and OpenAPI-generated API clients.
- Built key MyWIRA features including a dynamic FAQ page, multilingual support (Bahasa Melayu/English via EasyLocalization), a Contact Us page with Google Maps and WhatsApp deep linking, and a death withdrawal/heir application flow migrated from Angular to Flutter.
- Contributed backend development on ePusara, a digital cemetery management system for Majlis Bandaraya Johor Bahru (MBJB), implementing PUT/replace endpoints across permissions, users, burial lots, applications, and reference-table modules using Node.js, Express, and Prisma with Joi validation.
- Designed wireframes and high-fidelity UI mockups in Figma for the LTAT and ePusara systems, ensuring compliance with government accessibility standards.
- Contributed 30+ GitLab commits and merge requests, collaborating with developers, QA, and project managers to maintain code quality and on-time delivery.
- Resolved critical issues including API failures, OpenAPI schema errors, and Flutter Google Maps integration bugs, maintaining approximately 99% system uptime during UAT.
- Supported UAT and deployment activities validated at LTAT Bukit Bintang headquarters, ensuring features met functional and business requirements.

Internship Trainee – IT Department **January 2021 – June 2021**
Selangor Matriculation College

- Managed and updated the departmental website, ensuring 100% content accuracy and improved usability for 1,000+ active users.
- Assisted in processing and printing 500+ student ID cards, streamlining administrative workflows and reducing processing time.
- Performed routine IT maintenance, including hardware diagnostics and software updates, achieving 99.9% system uptime.
- Delivered on-demand technical support to students and staff, resolving issues efficiently and minimizing operational downtime.
- Collaborated with IT teams on infrastructure and ad-hoc technical projects, strengthening practical troubleshooting experience.

PROJECT EXPERIENCE

MyWIRA – Military Fund Member Services Platform (LTAT)

- Developed a Flutter-based mobile application for Lembaga Tabung Angkatan Tentera (LTAT), delivering modules such as FAQ, Contact Us, Announcements, and Death Withdrawal.
- Implemented full API integration, platform-based filtering, multilingual support, skeleton loading, pull-to-refresh, and Google Maps integration.
- Collaborated via GitLab and delivered features validated through User Acceptance Testing at LTAT Bukit Bintang headquarters.

ePusara – Digital Cemetery Management System (Government Project)

- Built backend PUT/replace endpoints (Node.js, Express, Prisma) across permission, user, burial lot, and application modules for Majlis Bandaraya Johor Bahru (MBJB).
- Designed UI workflows, wireframes, and high-fidelity mockups in Figma, improving usability and aligning with government accessibility requirements.
- Conducted UX research and requirement analysis, increasing stakeholder satisfaction and interface clarity.

Momentify – Facial Recognition Photo Management System

- Built a scalable Laravel-based web photo management platform using facial recognition to optimize image retrieval at large events.
- Created specialized roles, such as Event Manager, to reduce administrative workload and streamline event-specific content management.
- Conducted functional, performance, and user acceptance testing, improving system performance and user satisfaction.

KOOPUO – E-Commerce Platform for PUO Cooperation

- Developed a full-stack e-commerce platform enabling online sales, booking, and inventory tracking.
- Implemented a student booking system and storage management module, improving stock visibility and operational efficiency.

EDUCATION

Bachelor of Computer Science (Web Technology) With Honours **Oct 2022 – Jan 2026**

Universiti Tun Hussein Onn Malaysia (UTHM) | CGPA: 3.17 | Convocation: 1 December 2026

Relevant Coursework: Computer Architecture, Systems Analysis and Design, Fundamentals of Web Technology, Web Service Technology, UI/UX Design, Systems Management, Web Development

Diploma in Information Technology (Digital Technology) **June 2019 – June 2021**

Politeknik Ungku Omar | CGPA: 3.59

- Achieved Dean's List Award in semester 3 until semester 5.

CERTIFICATIONS & TRAINING

- Laravel Bootcamp: Web Development Using ChatGPT – applied AI-assisted development techniques to accelerate feature delivery.
- Build Your FYP with Laravel Bootcamp – strengthened real-world Laravel project architecture and deployment skills.
- Flutter Intensive Training – covered AI chatbot integration, payment gateways, and mobile app deployment.

ACTIVITIES AND INVOLVEMENTS

- Achieved First Runner-Up in the 'Business Website Challenge', demonstrating strong web development skills and innovative solutions.

ADDITIONAL SKILLS

- Fluent in Bahasa Melayu; intermediate proficiency in English.
- Proficient in Microsoft Office (Word/Excel/PowerPoint).
- Strong understanding of the Software Development Life Cycle (SDLC) and Agile practices.
- Ability to analyze requirements, troubleshoot, debug, and resolve technical issues efficiently.
- Effective team collaborator with strong communication skills; adept working in cross-functional teams.
